Deliver real time reports to users via email. Reports can be scheduled for automatic execution on a flexible schedule. WOW Search Agent (WSA) can attach to any WOW query operation while sourcing data from any relational database.

### Features Include

- Complete control of start dates, run times and scheduled execution
- Configurable SMTP servers
- Intelligent bursting supported
- Text, HTML or .pdf files can be emailed
- Uses Windows Task Scheduler
- Usage examples include emailing monthly invoices and statements. Sales managers could get daily updates on sales information. Purchasing managers could get immediate notification of a new purchase order.
